English

►►► Instruction of Bluetooth function:

Please download the SXi app from the App store (for free) and install in your phone (Searching SXmini and you will find it in the app store)

Please turn to the Bluetooth pairing in the menu:

Enter and you can see YES or BACK. Please choose YES, then the device will start pairing with the phone

Please pair: turn on the APP, click "Connection" and search, and then click the device which has been found and connected. It will show "pairing successful". Then you will find a symbol

Tips: If cannot connect with your phone, please check if you have followed this instruction step by step.

English

►►► Anti hijacking and pairing Precautions:

- When pairing, the App will create a new pairing code automatically with the device and this code will be remembered both by your phone and the device. There is no need to pairing again after that if you haven't pairing the device with other phone. Once the device has remembered the code, other phones (Even the SXi APP has been installed) cannot be connected with this device as long as it haven't pairing with the device.
- If the end user has many different phones, every time they change their phone to control the device, they need to pair the device with the phone. The device only remember the phone which has been newly paired.
- If any questions, please contact with our customer service team: Cservice@yihisxmini.com

English

►►► Cautions:

- It is important to protect the display well.
- It is prohibited to open the body of device, otherwise the warranty is invalid.
- Do not leave the device in high temperatures or damp conditions, as this may damage the device.
- Please make sure the surface of the batteries is complete and undamaged before using. Suggest using the same brand, the same model battery with same life time.
- If the e-liquid has leak to the body of the device, please dry in time, avoid reducing the service life time of the device by damaging the internal chipset.
- Check the authenticity of the device by entering the security code on our official website.
- Any SXmini products which are not bought from our official distributor WILL NOT be covered by the factory warranty.
- The USB port is mainly for upgrading purpose. If you prefer using it for charging, please plug or unplug carefully to ensure its using life. The warranty period of the device is one year and the USB port is three months from the date of purchase by the end user.
- This device has future upgrade capability. The contents of this manual will have future updates. The instruction of how to upgrade, and for the latest upgrade information, please refer to our website: www.yihisxmini.com. If you experience any problems while upgrading your SXmini T Class, please contact our customer service via email: Cservice@yihisxmini.com.
